## Mosquito spraying set tonight and Wednesday in Farmers Branch

FARMERS BRANCH ~ With three mosquito traps in Farmers Branch testing positive for West Nile Virus, all residential areas of the City will be sprayed for mosquitoes on Tuesday, August 11 and again on Wednesday, August 12, beginning at 9 p.m. and concluding no later than 5 a.m. the next morning.

Farmers Branch Environmental Health officials offered a glimmer of good news in that the numbers of mosquitoes contained in each of the traps was down significantly from previous weeks. All areas are being sprayed as the three traps are strategically located in different parts of the City's residential neighborhoods.

Residents are advised, as a precaution, to bring in pet dishes or cover them, cover aquatic ponds, fish ponds and birdbaths and do not go outside during the posted hours.

As incidence of West Nile Virus increases throughout North Texas through the late summer months into fall, residents are reminded to drain standing water, use insect repellent with DEET, and to avoid being outdoors at dawn and dusk when mosquitoes are most active.

Mosquito dunks (larvacide briquettes), for the treatment of standing water, are available free of charge (limit one per household) at Farmers Branch City Hall and at the Farmers Branch Senior Center. For more information, please call the Mosquito Hotline at 972.919.9868 or visit [farmersbranchtx.gov/mosquito](http://farmersbranchtx.gov/mosquito).
