Addison, Tx 75254

**Re: Request to Install a Water Meter and Register on Pump Discharge Pipe to Farmers Branch Creek**

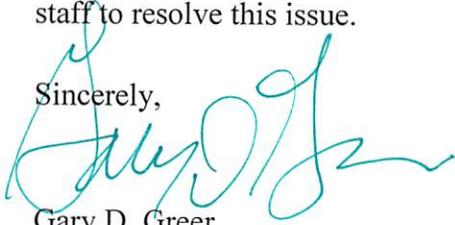

Dear Mr. Daniels:

As you know, the Town of Addison's water permit #5383A is a matter of great importance to the City of Farmers Branch and its residents, especially those who live along Farmers Branch Creek. Those residents have expressed concerns with decreases in creek flow volumes passed during the summer months. The City of Farmers Branch has a proposal to make to you to help provide assurance to those residents that Addison is maintaining adequate creek flows in accordance with its permit.

The City of Farmers Branch requests that the Town of Addison, at our cost, install a water meter with a register in a separate meter box between the Town of Addison's electronic meter that is now connected to its SCADA system and the discharge point into the creek. The City of Farmers Branch also requests access to the meter box to perform random quality assurance flow checks to ensure permit compliance. In this way there will be transparency for the concerned public and assurance that Addison is complying with the flow maintenance requirement of its permit. If The Town of Addison prefers, we would be happy to install the meter box, water meter, and register, ourselves at a location agreeable to both municipalities. In that same vein, we also request copies of your meter calibration records.

Please respond at your earliest convenience to this request. This issue is of great importance to the City of Farmers Branch and our residents. We look forward to working with you and your staff to resolve this issue.

Sincerely,

Gary D. Greer

City Manager
