

Farmers Branch Creek Report Week of 7/27/15

July 30, 2015

Summary:

Staff continues to monitor the pump station to ensure it runs consistently. Addison did not provide a well reading this week, but gave us the total number of gallons pumped during that time, for an average of 29,868 gallons per day. Assuming a flow rate of 32 gpm, this indicates they pumped an average of 15.6 hours per day.

Inspections:

Staff visited Vitruvian Park five times. Four of the five times, the well was running and based on visual inspections, there were no issues of note in the reservoirs.

Date	Time	Running?	Initials
7/28/2015	1:30pm	Yes	KE
7/28/2015	3:28pm	Yes	LM
7/29/2015	7:25am	No	KE
7/29/2015	10:31am	Yes	JT
7/30/2015	9:27am	Yes	JT

Well log (via City of Addison):

The most recent well information indicates that between 7/17/15 and 7/24/15, Addison pumped 209,080 gallons.

7/17/2015	Friday	337,200
7/24/2015	Friday	209,080*

**According to Jason Shroyer, Assistant Director of Infrastructure and Development Services, "the total shown is only for the last week it is not cumulative."*
